## EXPERIENCE

April 2020 - Present

### **Druz**, personal startup - Founder and Fullstack Engineer

- I successfully built a social platform that helps users get anonymous feedback from their friends and fans. With currently over **108k active users**, Druz boasts of being a well performant and scalable app.
- Implemented complex features using server side rendering to improve app performance and SEO.
- Enforced best practices by properly documenting code and establishing a uniform code style.
- I implemented a number of scaling techniques when the server could no longer handle certain requests which led to a massive increase in traffic gain.

October 2020 - December 2020

### **Solution Influx**, Remote - Frontend Engineer

- Developed internal tools and projects using React.js(Next.js), Redux, MobX and other technologies.
- Carefully implemented designs and functionality of a good number of internal products used by the company.
- Developed the first versions of the company's website, web applications and mobile app using React, Redux and React Native.

June 2020 - August 2020

### **Entrance Events**, Remote - Contract Frontend Engineer

- I worked on implementing the designs and functionalities of an Event Planner Application.
- Improved the User Experience of the entire application to a large extent by suggesting and implementing a better design system.
- I improved the load time and performance of the most complex part of the project which was the Admin Panel where admins handle all kinds of business related tasks and easily communicate with customers.

## SKILLS

**Languages:** HTML, CSS, JavaScript, TypeScript, Node.js

**Frameworks/Libraries:** React.js/Redux, Next.js, Gatsby, SCSS, Express.js, Nest.js

**Databases:** MongoDB, MySQL, PostgreSQL

**Others:** Algorithm Design & Analysis, E2E Testing, PWAs, Accessibility auditing, Responsive Web Design

September 2019 - December 2019

## Hotels.ng, Remote - Software Developer Intern

- Converted Figma and AdobeXD designs to UI components using React.js and SCSS.
- Closely worked with Backend Engineers to create products with the best possible user experience, maximum speed and scalability.
- Prioritized and managed multiple tasks across multiple projects, under tight deadlines.

## EDUCATION

January 2018 - Present

### University of Abuja, Abuja, Nigeria - BSc. Computer Science

- Took courses on Data structures and Algorithms, Numerical methods, Programming Languages, Computational Structures, Database Systems and more.
- Active member of The **Google Developer Student Club**(DSC).

## PROJECTS

**Druz**: Druz is a social platform I built with React.js, Node.js and MongoDB that helps users find out what others think about them through anonymous answers to questions on their profile. **The product was able to handle over 200k+ requests in the first week of launch** and even more ever since. The app is hosted at <https://druz.xyz> and currently has over 108k users.

**Checkref**: Checkref is a reference checking tool built with React.js and Node.js that simplifies reference checking processes thereby making it easy for HR professionals and recruitment agencies to easily request employee references. It's a pretty large application that comprises Recruiter, Candidate and Admin sections. It's hosted at <http://checkref.co>.
